-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Priority*

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### *Specification*

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

4. **Claims 1-3, 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Akinari et al., (Akinari), EP 0982614 A2.**

5. Akinari discloses shows in Figs. 3 and 8-11, a display unit for a vehicle, the display unit including; image display means such as a liquid crystal display panel for producing an image, and an optical system for permitting viewing of the image by a driver of the vehicle at a comfortable distance, wherein the optical system includes a silver mirrored reflecting surface and an optical prism having focusing power, the reflecting surface being interposed between the image display means and a first transmitting face of the optical prism and inclined with respect thereto to reflect the image onto the first face, whereupon the image is reflected from a second reflecting face of the optical prism towards and through a third transmitting face of the optical prism for viewing by the driver.

Art Unit: 2871

Accordingly, claims 1-3 and 6 are anticipated.

As to claim 7, it is clear from the Figs. That the first and third faces of the optical prism are convex and the second face is plane.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

**8. Claims 4, 5 and 8-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Akinari.**

9. As to claims 4 and 5, making prism from glass or acrylic material is common and known in the art and thus would have been obvious to avail a proven material.

As to claim 8, adjusting the distance between the image display and the optical

Art Unit: 2871

prism so that the image viewed by the driver appears at a comfortable viewing distance from the driver's eye is a routine skill in the art and thus would have been obvious to obtain a comfortable viewing.

As to claims 9-11 and 13, moving a prism between a stored position and a deployed position so that the driver views either the whole prism or a portion of the prism and considered as routine skill in the art and thus would have been obvious to obtain a comfortable viewing.

As to claims 12, 14 and 15, employing a framework to support the optical prism is common and known in the art and thus would have been obvious to strongly hold the optical prism and further providing a pivotal connection between the optical prism and the supporting framework is also common and known in the art and thus would have been obvious to provide a secured connection.

### ***Conclusion***

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
